Look to cities, not nation-states, to solve our biggest challenges.

World Economic Forum, 23 Jan 2020

A COALITION OF THE WILLING

SEA20 is a global initiative for collaboration between maritime cities – dedicated to the radical transformation of the marine and energy industries into one supremely efficient, ecologically sound, digitally connected and collaborative ecosystem.

SEA20

A NETWORK TO DRIVE CHANGE

Our aim is to connect marine cities and their stakeholders globally, inspire them, and work together to remove barriers in from of an emerging smart marine ecosystem.

Members of the network are invited to contribute and participate in SEA20 events, encouraged to become amplifiers of the need for change, and offered the opportunity to share their perspective with cities and the maritime community through the SEA20 platform.

The SEA20 initiative is run by Nordic West Office, a global affairs consultancy. The initiative is made possible by Wärtsilä, a global leader in smart technologies and complete lifecycle solutions for marine and energy markets.
