STM BALT SAFE – STATUS

13 CLIMATE ACTION

14 LIFE BELOW WATER

Recent results

- Successful simulations of VTS operations
  - Luckily there are not enough incidents in live operations
  - Preliminary result is that operators react faster when ships are sharing routes
- VTS in operations in RU, FI, NO, installed in EE
- Standard for MRS-reporting approved by IMO
  - Included in standard reference model

Next

- Join the project final conference Dec 16 https://www.seatrafficmanagement.info/news/stm-balt-safe-final-conference-december-16/
- Final reporting
